Case Study: Manufacturing

Dexian Successfully Provided SAP BI Services

©Dexian, LLC, 2023 | 4273429442

CLIENT:

The largest producer of long steel in Latin America

Challenge

- Client initially sought a partner to provide SAP Business Intelligence (BI) services
- Over time, the company's business needs evolved to also require support for multiple other SAP modules

Solution

- Technical Skillsets/Technologies used: SAP BI, BW, and ABAP
- Leverage Dexian's deep SAP expertise to support the company's functional and technical enterprise resource planning (ERP) needs
- Heavy investment in specialized training relative to SAP projects
- All onsite team members were required to be fluent in English – Dexian established partnerships with local language schools to improve our team's language skills

Outcome

- As a result of Dexian's expertise in managing SAP processes, the company has been able to modernize much of its ERP platform
- Improved efficiency and reporting
- Based on the success of our SAP projects with client, we continue to support many other of their projects in other areas
