Dexian Successfully Fulfills Client's Needs for SAP and Agile Resources

@Dexian, LLC | 4905317265

CLIENT:

An American multinational oil and gas corporation with a business presence in Thailand for nearly 125 years.

Challenge

- The client would like to establish and adopt industry best practices by implementing the latest technology architecture, RISE with SAP, to improve operating efficiency throughout its very large, complex global enterprise.
- As a huge cooperation with affiliates, the client would like to enable organizations to be more reactive, do more with less, and better serve the interests of its customers. An Agile Framework is necessary to improve business agility with systems and processes.

Solution

With decades of experience as an IT staffing and solutions partner and a deep understanding of our clients' businesses, Dexian™ collaborates with our clients to evaluate their needs and find and deliver the right people, with the right skills, at the right qualifications. Business solutions from Dexian provide additional benefits by helping our clients accelerate their transformation journeys, especially in SAP and Agile frameworks.

Outcome

- The SAP implementation project was successfully completed on time and on budget with Dexian expertise and support.
- The client transformed its global operations, optimized operational efficiency, and gained company-wide transparency.
- As a result of the success of this project, Dexian was asked to support future projects.
