

Case Study: Healthcare

Dexian Successfully Supports Optimization of PeopleSoft for Healthcare Delivery System

CLIENT INFORMATION:

A community-based healthcare system.

LENGTH OF CONTRACT

6+ Months

Problem

This medical system needed a complete overhaul of their PeopleSoft 9.2 system used by Payroll, HCM, Financials and Supply Chain (FSCM). In addition, they required a PUM upgrade from version 15 to 32 and a FLUID implementation.

Solution

Dexian provided 19 technical and functional consultants with competencies in PM, HCM, Payroll, FSCM.

Outcome

The project teams completed a successful go-live by the target completion date. After winning praise for the PeopleSoft Optimization Project, Dexian became a resource for the client's Workday Student project and other teams. Most of the original consultants have remained via project extensions.
