

# Dexian Successfully Delivers Team to Assist Workwear Designer with Business Growth and IT Transformation

**CASE STUDY:**  
Consumer Goods

## **PROBLEM:**

Legacy systems hampered the company's ability to meet surging product demand. A multi-year, multi-phase IT transformation was required to migrate from these outdated systems to the modern SAP Apparel and Footwear (AFS) solution, enabling the company to scale operations for future growth.

## **SOLUTION:**

Dexian leveraged its dedicated SAP division to assemble a project team with a powerful blend of functional, technical, and project management expertise. This cross-functional team was specifically focused on implementing SAP AFS and optimizing the client's supply chain processes for maximum efficiency.

## **CLIENT INFORMATION:**

A global apparel manufacturer with a premium work clothing brand.

## **TECHNOLOGIES:**

- SAP AFS S4

## **SKILL SETS:**

- SAP S4 BI Lead Consultant

## **OUTCOME:**

Dexian's team's successful SAP AFS implementation streamlined operations by retiring legacy systems. The modern solution's functionalities improved product delivery and likely led to a better customer experience.
