

Dexian Successfully Helps a Leading Automotive Software Company Build Team of Developers

PROBLEM:

Client needed to migrate significant portions of software from VB6 code to C# on a proprietary point of sale software. They also converted large point of sale applications from Microsoft Access to SQL server and developed several large reporting websites.

SOLUTION:

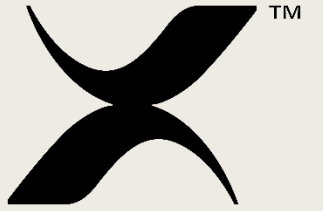

Dexian was able to fill 100% of the requirements through sourcing highly skilled IT candidates.

OUTCOME:

The consultants were successful in migrating the software to a new platform within the timeframe planned. Almost all consultant contracts were extended based on high quality of work.

CASE STUDY:

Consumer Goods
