

# Dexian Successfully Supports Top Hospital with Unified Communication Team

## PROBLEM:

The client needed a communication team to manage renovation for a board room; the new space would enable physicians to collaborate and consult nationwide using state of the art technology.

## SOLUTION:

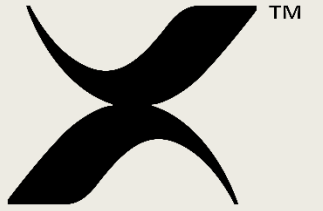

Dexian™ delivered a team of tech experts including Cisco Telepresence Technicians, a Network Engineer, Project Coordinator and Project Manager. The team provided by Dexian managed the project from preparation and bid through build-out.

## OUTCOME:

The room became a benchmark for the hospital's new care facilities, enabling cancer physicians nationwide to engage in collaborative consultations. WebEx technology was deployed to bring live PACs/Microscope/MRI imaging to the virtual consulting room.

## CASE STUDY:

Healthcare

## CLIENT INFORMATION:

One of the nation's leading academic hospitals on the West Coast, awarded in multiple medical specialties.

## LENGTH OF CONTRACT:

12 Months

## SKILL SETS:

- Cisco Telepresence
- Technicians
- Network Engineer
