Dexian Successfully Provides Mobile Test Engineers to Real-Time Messaging Software Company

PROBLEM:

The client required testing engineers familiar with iPhone and Android, Android Studio, XCode and adb. Release dates for new functionality drove project deadlines.
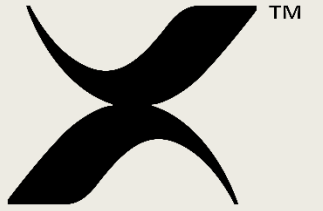

SOLUTION:

Dexian™ sourced consultants who quickly grasped the new functionality, created a test strategy, and executed on it.

OUTCOME:

The client was impressed by the performance and professionalism of Dexian's consultants, noting the team's ability to work with minimal management oversight. Dexian's relationship is continuing.
