

Dexian Successfully Develops Mobile Application Development and Management

PROBLEM:

Seeking a mobile app development partner to build a high-quality customer app, the client envisioned a long-term partnership for future enterprise mobility projects.

SOLUTION:

Dexian's team built a secure cross-platform mobile retail app (Java, JBoss, iPhone SDK) safeguarding it with multi-layered security (code, testing, lockdown).

OUTCOME:

Cloud and mobile app development empowered the client with a secure, user-friendly experience, improved processes, and real-time data for competitive pricing, boosting customer satisfaction and profitability.

CASE STUDY:

Retail

CLIENT INFORMATION:

An American chain of department stores.
