

Dexian Successfully Develops iOS-Based Mobile Application

PROBLEM:

The client sought a mobile-friendly (iOS) version of their existing oil and gas drilling tractive force calculator, aiming for a simpler and more user-friendly experience for field personnel.

SOLUTION:

A 5-person team (onsite iOS dev & UX engineer, offsite project manager, UI & QA engineers) revamped the client's oil & gas drilling calculator app using Objective-C and SQLite for a user-friendly mobile experience on iPads.

OUTCOME:

Dexian's mobile drilling calculator app empowers oil & gas clients with faster, on-site decisions, enhancing Dexian's client's service offerings.

CASE STUDY:
Energy

CLIENT INFORMATION:

A global provider of field services to petroleum-oriented clients
