

Dexian Successfully Provides Quality Maturity Level Assessment and Testing

PROBLEM:

The client needed to evaluate their existing QA testing infrastructure, seeking improved processes, tools, and staffing to optimize testing efficiency.

SOLUTION:

A 2-person QA team (comprised of an Agile tester and a Senior Testing Architect) assessed the client's testing processes, identifying gaps against best practices through a QMLA and thorough environment analysis.

OUTCOME:

Dexian's analysis pinpointed gaps in the client's testing processes and identified automation opportunities aligned with industry best practices.

CASE STUDY:

Technology and
Telecommunications

CLIENT INFORMATION:

The leading provider of enterprise software solutions for International Trade Compliance.
