

# Dexian Successfully Supports Database Build-Out for Global Research University

## PROBLEM:

The client wanted a database to track salaries of professors and determine the school's profitability.

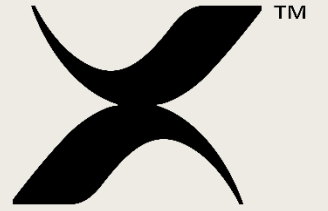

## SOLUTION:

After building a relationship with the university's IT services team, Dexian™ was referred to the business school to assist with this project. Dexian sourced a qualified consultant within the target timeline.

## OUTCOME:

Dexian has subsequently been referred to additional schools within the university.

**CASE STUDY:**  
Technology

## CLIENT INFORMATION:

A global research university known for "co-op" education that integrates classroom study with professional experience.
