

Dexian Successfully Provides Mature Agile Teams through Nearshore Service Offering

PROBLEM:

Client needed an affordable, integrated IT support with skilled developers and testers in a similar time zone. Existing nearshore vendors lacked expertise and communication, causing delays and quality issues. Client needed help managing a nearshore team.

SOLUTION:

Established Agile teams of skilled developers and testers in Brasil, providing thought leadership and expertise at an optimized cost. A streamlined recruitment process with technical assessments ensured a fast time-to-market.

OUTCOME:

Reduced costs by 25% compared to onshore teams, delivered high-quality software faster, and improved communication/satisfaction due to time zone alignment. A streamlined recruitment process saved managers time by reducing interview durations.
