

Dexian Successfully Staffs PMO Team to Manage ERP Migration and Advanced Infrastructure Project for Energy Utility

PROBLEM:

After multiple acquisitions, the client needed to manage an ERP data migration from SAP to Oracle. At the same time, the team needed to complete an advanced infrastructure project — updating meter technology at 1.7 million customer locations. This key project impacted every area of the business.

SOLUTION:

Dexian® delivered a consultant team experienced in working on complex initiatives, including a range of skillsets.

OUTCOME:

The success of this project led to many additional placements. Dexian is currently the #1 vendor.
